

DWR CCTAG Scenarios Subgroup Meeting

July 18, 2014

**California Department of Water Resources
Climate Change Technical Advisory Subgroup Meeting**

July 18, 2014

9:00 am-12:00 pm

DWR Creekside Conf Room, 2nd floor, Bonderson

<https://resources.webex.com/resources/j.php?ED=229264172&UID=491358787&RT=MiM0>

Provide your phone number when you join the meeting to receive
a call back. Alternatively, you can call:

Call-in toll-free number (Verizon): 1-877-923-1522 (US)

Host access code: 679 474 0

Attendee access code: 295 056 7

AGENDA:

Draft Recommendations Report, due end of 2014

1 Background, Purpose, Need

2 Model Selection

3 Stress Tests

4 Downscaling

5&6 Discussion - to be authored by Members only

Guidance for Applications

Future Investigations and Improvements

Plan for 7/28 Full CCTAG

Briefing on DWR Decision Scaling study

To Draft Recommendations Report Text

Recommendations from CCTAG on the applied use of these models

- 11 models x 2-3 emissions RCPs x 1-5 initial conditions runs....
 - Not all (probably most) projects will only be able to analyze a subset of the projections
 - Sampling vs. Ensembles
 - What would the CCTAG like DWR and others to consider when using something less than the full complement of models?
- ❖ Remember the Bay Delta Office has always anchored projections to historical hydrology and sometimes are there additional recommendations that you would like to make on this process?

7/28 CCTAG Planning

Recommendations Paper - Work Sessions:

Sections 1-4

Sections 5&6; CCTAG Members only

Other Topics:

Assessment Reports update

CVFPP and climate change update

Decision Scaling Analysis

Briefing on DWR Decision Scaling For DWR Vulnerability Assessment

THANK YOU!

Next Full CCTAG *July 28th*

Next Subgroup *August 15th*
